

Telewind

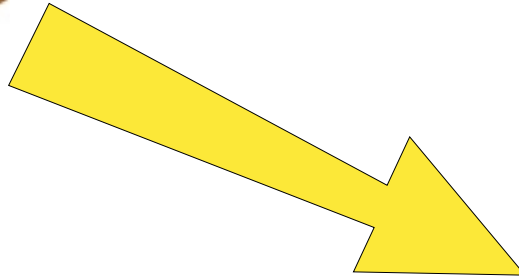

KIT RADIO REMOTE CONTROL

+

ANEMOMETER

FOR CRANES

with the reading of the anemometer data
on the radio remote control display

Radio remote control JUMP with 7-10-14 push buttons,
for the remote cranes control

Thanks to the "data feedback" channel you can read
anemometer data on the display (wind speed, alarms)

The anemometer is reliable and easy to be installed
on a crane; you can set different alarm as well as
pre-alarm thresholds, both visual and sound.

More safety

More working comfort
