

## Ravioli at ISSA Interclean 2014

The **Ravioli** company, manufacturer of electrical devices for traction applications since 1926 and leader in the international market in the traction field, provides a complete range of D.C. *Contactors and Europe Series Twin Connectors*, both particularly suitable for forklifts, industrial cleaning machines, golf cars, electrical bicycles, cars and bikes. A long experience allowed Ravioli to widen its range of products through the years.

Twin Connectors Europe Series at ISSA Interclean 2014. The complete range 80A, 160A and 320A is provided with a shock resistant or an acid-proof polymer housing. All electrical parts are protected against accidental contact; standard equipment includes a balanced cable clamp, ensuring IP23 to the coupled connectors. Different coding pins for wet batteries (grey), dry batteries (green) and universal battery chargers (yellow); max operative volt-

TL LOGO D.C. Contactors, types TL10 and TL11, suitable for cleaning machines, have been recently improved to be more performing. The range has also been widened with two new models: TL15 (1NA contacts) and TL16 (1NA and 1NC contacts) up to 150A, both designed with the same comfortable reduced dimensions which are already a precious advantage of TL10 and TL11. Besides, in compliance with DIN VDE 0623-589, defining unified distances between centers and unified coupling dimensions, Ravioli is proud to launch its improved

age 150 Vdc; temperature range from -20°C to +90°C; a series of accessories among which reducing brushings for an easier wiring, with different cable sections; auxiliary contacts, up to 4 contacts (2 primary and 2 secondary), perfectly interchangeable with previous models provided so far. ■
